## Projects

- Personal website

URL:- <https://chethanshetty4.github.io/portfolio-website/>

Personal resume website shows my qualification and skills. Designed with a user-friendly interactive interface and with responsive design.

- Online Car Rental System

This is a database management project along with front-end which helps the customer to book the cars online for renting and it stores the customer details in the database.

- Malicious website detection

This project helps in detecting the malicious websites in the browser. By collecting the information from URL and with the help of Machine Learning algorithm we check if the website is safe or not.
